

The Progress Map and Progress Mapping Tool

The Progress Map

Is a bridge between research findings and your own work

Summarises research evidence and offers challenge questions to help you use this evidence for local improvement

The Progress Map

Gives you data at national, regional and, where available, local levels

You can manipulate and compare data between regions and LA areas.

The Progress Map

Gives you :

- a range of web based tools and resources
- the opportunity to suggest resources and good practice examples
- and lets you download and customise content

Progress Map: Demo

<http://www.c4eo.org.uk/>

Benefits

- All knowledge in a “one stop shop”
- Better use of data and evidence to challenge and plan change to practice and service delivery
- Interactive – tailored to people’s own use, contribute as well as disseminate knowledge

Progress Map: Timelines

- Launch – today
- Initial training materials/help – end January
- Online tutorials – End February
- New features – through out 2009
- New resources, data and good practice examples – ongoing
